SYED USAMA

ServiceNow Developer | CIS-DF Certified • Software Engineer

Hyderabad, Telangana, India • +91 7995220139 • usama1k999@gmail.com • github.com/Usama1k99

PROFESSIONAL SUMMARY

Results-driven **ServiceNow Developer** and Software Engineer with **1 year of professional experience** at Cynosure Technologies building enterprise ITOM/ITSM solutions, Configuration Management Database (CMDB) architectures, and Common Services Data Model (CSDM 4.0) frameworks. Certified Implementation Specialist in Data Foundations (**CIS-DF**) with a Bachelor of Technology in Computer Science and Engineering completed in **2025**. Adept at developing automated workflows using Flow Designer, Business Rules, Client Scripts, Script Includes, and bi-directional REST integrations, paired with deep foundation in Python, JavaScript, and systems software.

PROFESSIONAL EXPERIENCE

Cynosure Technologies — *ServiceNow Developer* | Hyderabad, India (2025 – Present • 1 Year of Experience)

- Architected and configured enterprise CMDB data structures aligning strictly with CSDM 4.0 standards across Foundation, Technical Services, and Business Application domains.
- Implemented Identification and Reconciliation Engine (IRE) rules, payload processing, and deduplication logic to ensure Configuration Item (CI) integrity and improve CMDB health scorecards.
- Developed robust platform workflows and automated business logic utilizing Flow Designer, Business Rules, Client Scripts, UI Actions, and Script Includes for enterprise service delivery.
- Engineered custom REST API integrations and Integration Hub data streams to automate bi-directional synchronization with external monitoring, security, and third-party IT management systems.

CERTIFICATIONS

- **ServiceNow Certified Implementation Specialist – Data Foundations (CIS-DF)** (CMDB architecture, CSDM 4.0 governance, IRE, and CI health)

TECHNICAL SKILLS

ServiceNow & ITOM: CMDB, CSDM 4.0, Identification & Reconciliation Engine (IRE), Flow Designer, Business Rules, Client Scripts, Script Includes, UI Actions, Integration Hub, REST API Integrations

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS

Backend & Languages: Python, Django, C++, C, SQL, RESTful APIs, PyQt, Tkinter

Databases & Developer Tools: MongoDB, Git, GitHub, Postman, VS Code, Windows CLI

KEY PROJECTS

Encryptify — Cryptographic Suite (encsite) | Python, Django, NumPy, Pillow

- Engineered a full-stack cryptography suite integrating 1MB Enigmatrix block cipher (1024×1024 matrix permutations, XOR layers, modular arithmetic), Steganography engine (Steganos) concealing encrypted payloads into RGB channels, and deterministic 32-bit PRNG image pixel scrambling.

DarkPad | Python, PyQt, Regex Engine

- Developed a lightweight dark-mode text editor featuring regex multi-pattern search & replace, live editor telemetry, and secret utility keybindings for embedded cryptographic transformations and binary encoding.

Enigmatrix — High-Performance Encryption Engine | Python, PyQt6, NumPy, Cryptography

- Developed a custom file encryption tool featuring 1024×1024 subkey matrices (SHA-256/BLAKE2b expansion), PRNG-driven permutations, modular arithmetic, multithreaded CPU parallel execution, and optional RSA key wrapping with a PyQt6/CLI interface.

Discord Automation Bot | Python, MongoDB, Discord API

- Architected an asynchronous community automation bot utilizing MongoDB persistence for user configuration, modular command execution handlers, and automated channel moderation.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering — *Graduated in 2025*

- **Shadan College of Engineering and Technology**, Hyderabad, Telangana (Completed in 2025) • Capstone: Machine Learning Image Classification & Blockchain Supply Chain
- **Intermediate (12th Standard – MPC)**, MS Junior College, Hyderabad (2017 – 2019)
